

inevaeco tencel® natural fibre

... innovation from start to finish

The new inevaeco quilt is made (fill and cover) from Tencel, a sensational new fibre that is 100% organic, made from natural wood cellulose originating from sustainable forestry plantations.

Tencel is supple, durable and flexible and has an incredibly silky smooth surface that has a cooling sensation on the skin. Because Tencel is naturally pure and has no synthetic impurities Tencel fabrics are perfect for sensitive skin.

Sensitive skin reacts quickly to heat and cold as well as other irritations and Tencel feels cool due the particularly smooth surface and the high moisture absorption of the fibres.

This ability to absorb moisture prevents the formation of bacteria on the skin; moisture is absorbed right into the fibre and doesn't stay on the surface to feel wet.

The moisture absorption of Tencel is enormous, compared to other fabrics Tencel absorbs 50% more.

Research has shown that the combination of the natural properties of Tencel will help to prevent irritations of the skin, and create a sense of well being and comfort because of the skin sensory characteristics of the fibre.
